AGAIN THIS YEAR, for the ACG Annual Scientific Meeting,
ACG will consider late-breaking abstracts of high quality
clinical research results. ACG will consider extending the program
to create a few additional oral presentation slots in response to
submissions of great merit and clinical interest.

Please do not resubmit abstracts already considered during the regular 2022 abstracts review process.

Late Breaking Abstract Submission Period
Opens Monday August 15, 2022.
Deadline to submit late-breaking abstracts:
THURSDAY, SEPTEMBER 1, 2022
11:59 pm Eastern Time

Dear Colleagues:

It is my great pleasure to invite you to ACG 2022, the American College of Gastroenterology's Annual Scientific Meeting and Postgraduate Course, which is the premier GI clinical event of the year. The College celebrates the value of live meetings as important professional opportunities to network and engage with your colleagues while immersing yourself in excellent clinical research and educational updates. True to our Mission and Vision, ACG 2022 will offer meaningful ways to connect in-person with colleagues and engage with faculty. Don't miss the chance to gather in North Carolina at the Charlotte Convention Center for courses and scientific plenary sessions with a focus on the educational needs and priorities of clinical GI practitioners and to experience the energy and excitement of convening live.

Internationally known faculty and rising stars in the fields of gastroenterology, hepatology, and endoscopy will deliver the latest clinical updates on common and not-so-common GI disorders, and interact with attendees, address questions, and engage in lively debates.

Can't make it to Charlotte for some or all of the meeting? ACG has you covered with convenient virtual or on-demand options for all courses. Access to recorded sessions and on-demand lectures will be available in the ACG Conference Platform until March 31, 2023.

ACG 2022 delivers many benefits to attendees:

- Networking events to connect with old colleagues and make new friends
- Accessible scheduling of educational sessions that provide ways to enhance patient care and improve practice efficiency
- CME credits and MOC points for all courses
- Access to all sessions on-demand so both in-person and virtual attendees will not miss a minute of programming
- Plenary presentations and NEW! 5 poster sessions showcasing high impact clinical research
- An exhibit hall displaying the latest advances in technology and therapeutics
- FREE Hands-On Endoscopy Workshops to learn about new tools and techniques

The ACG Annual Scientific Meeting is the ONLY major GI meeting that is still offered as a member benefit at no extra charge, thanks to the support of our exhibitors and sponsors. ACG members also receive discounted registration rates for the Postgraduate Course and Friday courses. The College can continue to offer this member benefit thanks to the participation of our exhibitors, as well as sponsorships and promotions which help to offset costs for the meeting. Without their support, the meeting in its current form would not be possible. Exhibitor participation also gives you the opportunity to learn the latest information about their products without disrupting your busy work schedule. I encourage every attendee to visit the Exhibit Hall while at ACG 2022, take advantage of all that you can see and learn, and express your appreciation to exhibitors for their participation at the meeting.

It is noteworthy that the College is celebrating its 90th Anniversary. I think the founders of the organization would be thrilled with the ways in which the College is always growing, changing and improving while keeping our eyes on our collective mission and vision. In that spirit, I encourage you to join me in Charlotte—a new city for the Annual Meeting and Postgraduate Course—from October 21st through the 26th, to connect with colleagues and friends while enjoying unparalleled clinical education. Take a moment to register today. I look forward to seeing you there!

– Samir

PRACTICE MANAGEMENT SUMMIT 2022:
Mounting Pressure For GI Practices: But A Toast To Survival
Friday, October 21, 2022 | 1:45 pm – 5:30 pm | Room E219AB
Course Directors: Vonda G. Reeves, MD, MBA, FACP, and Manoj K. Mehta, MD, FACP

COURSE DESCRIPTION
Join ACG in 2022 for our Practice Management Summit. Healthcare delivery is transforming at an accelerating rate, but opportunities in the field of gastroenterology remain strong for private practice physicians to claim ownership of their practices and their careers. Managing challenges to independence will be even more important during these changing times, but that alone will not be enough for success. Participants in the Practice Management Summit will hear from colleagues about new and innovative ways to improve operations, enhance productivity, and guarantee success of their practices.

2022 ACG ANNUAL POSTGRADUATE COURSE

Course Directors: Christina Y. Ha, MD, FACG, and Colleen R. Kelly, MD, FACG

PROGRAM DESCRIPTION

With the need to remain abreast of the many new and emerging advancements in the field of gastroenterology and the patient volume increasing as the population ages, the clinical gastroenterologist is more challenged than ever to deliver the best patient care in each situation they encounter. Research across gastroenterology and hepatology areas progresses at a rapid pace. Advances in technology, diagnostic modalities, and therapeutic options have had a positive impact on the management of many GI diseases. Scientific education, based on critical foundational knowledge and clinical skills, the communication of practical methods for treatment, and the ability to integrate the newest tools in diagnosis with the latest therapeutic/treatment options, are key necessities for the GI clinician to deliver top quality patient care. This course will provide updates on a variety of gastroenterology and hepatology subjects including IBD therapy, colorectal cancer screening, functional GI disorders, esophageal disorders, GI bleeding, and liver disease. Expert faculty will deliver scientific presentations in a variety of formats. Didactic lectures, followed by interactive question and answer sessions, a choice of simultaneous sessions, and in-person Optional Learning Luncheons (separate purchase required) on the latest topics in GI and liver clinical care will be offered.

The program is designed primarily for clinicians in GI/hepatology, as well as physician assistants, nurse practitioners, and other advanced practice providers interested in a scientifically sound approach to the management of GI and liver illnesses.

OUTSTANDING POSTER PRESENTER RECOGNITION

The College is pleased to continue the tradition of presenting awards for “Outstanding Poster Presenter” at this year’s ACG Meeting in Charlotte. ACG hopes to cultivate the ability of clinical GI researchers to use critical storytelling and presentation skills essential for a career as a clinical investigator and scientific communicator. During the daily Poster Rounds with the Experts, poster presenters may be invited to give a succinct and informative two-minute briefing on their research, followed by one minute of Q&A with a faculty judge. Each judge will select one or more presenters who are best able to communicate their key findings, the significance of their data, and articulate the potential impact of their work for clinicians and patients. Recipients of this award will be recognized with a red ribbon, and will later receive a certificate of recognition. Please note that only those poster presenters who display posters in-person in Charlotte will be eligible for this special designation.
